JORDAN physiotherapeutic couch, A line

JORDAN A line – actuator-free couches with fixed height.

All model of this line are made at a standard height of 60 cm, but you may change this fixed height in your purchase order. Simple but solid structure guarantees high stability. Leveling screws can compensate for floor unevenness. The headrest can be adjusted either by a system of A1 levers or by an A3.

It is one of the most simply constructed couches on the market.. It has a broad field of application as an examination table in medical practitioner and specialist doctor surgeries, as massage tables or relaxation couches in spas, welfare institutions and sport centres.

JORDAN physiotherapeutic couch, D line

JORDAN D line – actuator-free couches with manual height adjustment using a lever mechanism.

The height of all the models can be adjusted manually using a built-in lever by the patient's feet. The adjustment range is from 65 to 85 cm. Base width of 100 cm for model D1 can be changed on request at no extra cost in the range of 70 to 100 cm.

JORDAN
D1

JORDAN
D2

These couches are recommended in particular for places where the service staff rotates, for example different massagers working with the same bed. This bed can be adjusted to individual height. Depending on your needs you may choose from three basic models as well as from a number of accessories.

This line is recommended for massages in spas, physiotherapy or sport centres, where it is used by more than one massager.

JORDAN physiotherapeutic couch, E line

ORDAN E line -single-actuator couch with electric height adjustment, specially designed for the Vojta method.

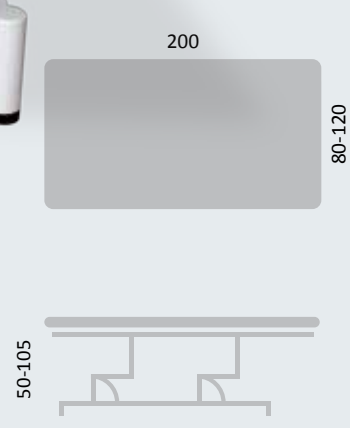

The basic design for Vojta method offers a single-actuator bed with electric height adjustment. The construction is stable in all therapeutic positions and heights with a lifting range from 50 to 105 cm even with the patient lying on the bed. **At your request, we can reduce the minimum height of 33 cm. Stroke is then in the range of 33 to 85 cm.** The standard bed width is 100 cm, but you can extend it from 80 to 120 cm. Beds are used in particular in welfare centres for children, physiotherapeutic centres specializing in the Vojta method as well as in households for home exercises with child patients.

We also manufacture a simpler actuator-free JORDAN E folding box couch with fixed height for the Vojta method. The bed is delivered in a standard 100 cm width. You can specify the required height in the purchase order.

The mobile JORDAN E box is an ideal solution for smaller premises – apartments and multi-purpose rooms.

JORDAN gynecologic couch, H line

JORDAN H23e - electrically operated gynecologic chair combined with coach.

Height positioning can be carried out even at full loading of the table in range 65 cm – 95 cm with the use of a manual or foot (extra charge) operated electric motor control. The seat tilt setting is electric in range from -10° to 40°. Adjustable removable handles are located on both sides of the seating part. A sanitary paper rack is attached to the backrest. The backrest tilt setting is also electrically controlled in range from -10° to 65°.

In basic version, the chair is supplied with chromed footstalls. For extra charge it is possible to supply calf supports of washable foam

polyurethan with a special joint by means of which the supports can be tilted and fixed according to requirements. A stainless steel vessel is located under the seat. When the vessel is removed, it is possible to attach third part of coach (for extra charge) for lying position of a patient. The chair can be equipped with a tilting step for comfortable seating (for extra charge).

JORDAN wood

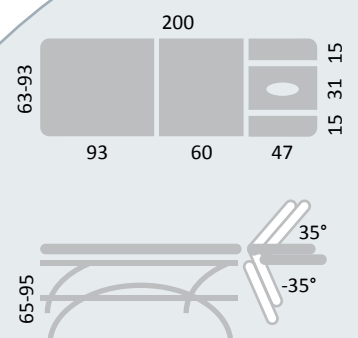

Our professional model JORDAN HENRY is made of ash tree wood.

Beside his technical details, JORDAN HENRY distinguishes by its beautiful design. Our top model is produced in traditional technics of joiner's handicraft in cooperation with masseurs and therapists and guarantees long life even at strongest demands. Wood as base material especially for massage tables offers many advantages:

It does not absorb any rays and creates a feeling of comfort for the customer due to its exceptional look. Best imitation leather materials and a 4 cm thick layer guarantee an optimal comfort.

Colours chart for JORDAN couches

Choose the colour which will best suit your workplace because colours have the power to affect your moods and feelings.

Opt for the yellow of the sunlight, brighten up your office with a sky-blue table; let the green upholstery enhance the peaceful atmosphere or relax by a pure white table.

Let your imagination decide.
